

On-Site Industrial Hose Services

TESTING • CERTIFICATION • REPAIR

Why is it important for hose to be tested...

➔ **to increase** **SAFETY**
and Reduce Costs

Apache Hose and Belting would like to be your premier service provider of hose and coupling testing.

Periodic testing of your hose assemblies by the Apache Industrial Hose Service Group can help you minimize the potential for serious injury, death, and/or the uncontrolled release of costly product. These tests are conducted and the results analyzed to determine whether hose and coupling conditions meet requirements, or if assemblies are in need of immediate repair or replacement. This preventative maintenance is a key component to the safety of your personnel and the environment.

Documentation / Tracking / Training

Hose surveys give you an important view of the in-service hose condition and application information that can be critical to your operations.

Tagging, serial numbers, and electronic records for hose and coupling specifications provide documentation for hose products throughout their life cycle and assist in important product selection and preventative maintenance decisions.

Tracking records assist your staff and Apache personnel in scheduling appropriate maintenance, and give you a time line of hose performance and service life.

Training your staff to recognize potential problems and the proper care / maintenance of hose increases hose service life while reducing product and personnel risks.

Reduce Your Costs

Removing hose and couplings that are deteriorating or that have the incorrect specifications for the required application can lower your costs by greatly reducing the following:

- **Unnecessary downtime**
- **Costly environmental clean up**
- **Loss of product**
- **Employee injury due to failure**
- **Higher insurance premiums**
- **Potential fines**

Established in 1963, Apache Hose & Belting Co., Inc. is proud to be an employee-owned, worldwide distributor and fabricator of quality belt, hose, and cut rubber products. To compliment our extensive custom and value added products and services, we have added a Hose Testing Services Division that specializes in the following.

In-House and On-Location Services:

- Hose Testing & Recertification
- Pressure Testing – to appropriate standards
- Repair and Recertification
- Hose Tagging and Serial Number Tracking
- Steam Hose Testing
- Certified Parker/Dayco Anhydrous Ammonia Coupling

TECHNICIANS

Trained technicians perform pressure tests to appropriate standards and supply detailed certificates for each hose tested. Our technicians have years of related experience and all work in our ISO 9001:2000 certified facility where observing detailed work instructions for consistent high quality performance is a daily practice. We take great pride in our products and services, and no job is too big or too small.

APACHE PRODUCTS

Apache sources materials from a host of different manufacturers both domestic and abroad. The depth and breadth of product lines and suppliers is our commitment to getting you the product you want, when you need it. To find out more about products you can utilize for your hose needs call Apache's Hose Services Customer Service Department at 800-332-3243 or send an e-mail to hoseservices@apachehb.com.

TESTING EQUIPMENT

Apache's portable hose testing equipment makes it easy to test on-site. Our equipment tests multiple hoses at one time to speed up the certification process. Contact Apache's Customer Service Department today to set up an on-site testing appointment.

TESTING

Hose can be tested on-site or in our state of the art 125,000 ft. production facility. All tests are documented for future reference. Hoses that successfully pass testing are tagged with a stainless steel band listing Apache Services, Test PSI, Test Date, and Serial Number. Hoses that fail to pass the test at any level are tagged with a highly visible "defective" tag that includes the reason for the test failure.
